

SUBHA PATTANAYAK

Bangalore, Karnataka | hellocoder78@gmail.com | +91 9883891806 | LinkedIn

Final-year Computer Science and Engineering student (2022–2026) at Jain (Deemed-to-be) University, Bengaluru, passionate about building intelligent, scalable, and user-centric web and AI systems. Full-Stack Developer with a solid foundation in JavaScript, TypeScript, React.js, Node.js, MongoDB, and Agentic AI, specializing in designing seamless digital experiences backed by reliable backend architectures.

EXPERIENCE

Zortech Solutions Pvt. Ltd. | *Backend Developer Intern* | Remote

June – July 2024

- Developed backend REST APIs for internal services using Node.js and Express.
- Worked closely with the frontend team to define request structures and improve performance.
- Implemented JWT-based authentication and MongoDB queries for secure data retrieval.

RegistrationWallah.com (Freelance) | *Full Stack Developer* | Remote

May – October 2025

- Built the official website from scratch using the MERN Stack with JWT authentication.
- Integrated APIs using Express.js and implemented WhatsApp for chatting purposes.
- Built a simple ChatBot trained on company data for handling routine queries.

PROJECTS

Movie Recommendation and Streaming Platform

2024

Tech Stack: React.js, TypeScript, Express.js, MongoDB, TMDB API

- Designed a full-stack movie streaming website with a personalized recommendation engine based on user watch history and genre preferences.
- Integrated TMDB API to fetch real-time movie data, trailers, ratings, and metadata for thousands of titles.
- Implemented user authentication with JWT, watchlist functionality, and a responsive UI built with Tailwind CSS.

QuantForge — AI Trading Signal Platform

2025

Tech Stack: React.js, TypeScript, Express.js, PostgreSQL, Recharts, TanStack Query

- Built a full-stack cryptocurrency trading dashboard with real-time AI-generated BUY/SELL/HOLD signals across 15+ trading pairs.
- Created a Strategy Builder with full CRUD — create from templates, edit parameters, run backtests, and delete strategies.
- Designed 10+ RESTful API endpoints and integrated interactive Recharts with a live signal feed via TanStack Query.

MLOps — ML Experiment Tracking & Model Management

2026

Tech Stack: Python, MLflow, Docker, REST APIs, Cloud Deployment

- Built an ML experiment tracking system using MLflow, enabling tracking of parameters, metrics, and model versions across multiple training runs.
- Integrated MLflow Tracking Server and Model Registry to manage model lifecycle, versioning, and reproducibility.
- Deployed using Docker and cloud tools with REST APIs to trigger training workflows and monitor experiment results.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) in Computer Science Engineering | CGPA: 7.4

Jain University, Bengaluru | 2022 – 2026

Class 12 (Science Stream) — DAV Public School, Raniganj | 83% | 2021

Class 10 — Hem Sheela Model, Durgapur | 89% | 2019

SKILLS

Languages: JavaScript, TypeScript, Java, C, HTML, CSS, Python, PHP

Frameworks: React.js, Next.js, Node.js, Django, Express

Databases: MongoDB, Prisma ORM, PostgreSQL, SQL

Authentication: JWT, OAuth, NextAuth.js

DevOps & MLOps: Docker, CI/CD (GitHub Actions), MLflow, basic cloud deployment

Tools: Git, GitHub, Postman, VS Code, Tailwind CSS

Soft Skills: Strong communication, team collaboration, problem solving, analytics

RELEVANT COURSEWORK

- Actively solving DSA using Java on LeetCode and participating in competitive programming on CodeChef.
- Working on RAG models for building Agentic AI using LangFlow, LangChain, and HuggingFace.
